Advanced Heart Failure · Echocardiography · Internal Medicine

Dear New Patient;

Welcome to Port Charlotte Cardiology. We are looking forward to treating your cardiology needs.

If you are "self" referral, the Doctor will need your most recent "cardiac" records (cath, stent, bypass report, labs, echo or stress test report) before your appointment. If any other records are needed, you may need to obtain them before your appointment. If you have an out-of-state doctor, please have your records faxed to us prior to your appointment.

By having your records on hand before your appointment, this will assure that we do not duplicate any testing that has already been completed. If we do not have your records in advance we may need to **reschedule** your appointment.

Also, in an effort to decrease the time in our waiting room, enclosed you will find paperwork to be completed prior to your arrival. The information requested on the enclosed forms is essential in understanding your personal medical history and will allow us to give you the best medical care possible. It is therefore very important that you take the time to fill them out. You can also find the forms on our website www.portcharlottcardiology.com at the very top.

****** Please remember to bring the completed forms with you on the day of your initial office visit, along with photo ID, your current insurance cards, and current list of medications***

Note: Co-pays and deductibles are always collected at the time of your visit. Our "self-pay" Policy is \$250.00 at your initial visit. We can set up payment plan for any future appointments.

We look forward to serving your cardiac needs

Sincerely,

Aneley Hundae
